

CareID Alert

Visible Emergency Identity

FOR PEOPLE LIVING WITH EPILEPSY & THEIR CAREGIVERS

A clearer starting point when words are hard to find.

CareID connects a scan to condition-specific emergency guidance, with the option to add personal emergency information.

Start free with a lock-screen wallpaper.

Choose Epilepsy / Seizure Safety and create a wallpaper with your own CareID QR. Condition-Ready guidance contains no personal identity, medications, or emergency contacts.

Email is used for ownership and recovery. Marketing consent is optional.

Optional paid formats and personalization

CareID Beacon, CareID Card, and Digital CareID are paid options. Personalized CareID can add owner- or caregiver-provided emergency details after setup and review. Families manage their own information and purchases.

Learn more. Start free.

Scan for the family introduction and free-start link.

/pages/medical-id-for-epilepsy-and-seizures

This is a resource QR, not a personal emergency ID.

Opening an online CareID page requires internet. CareID does not replace a seizure action plan, emergency services, or professional medical care.
